

# ***AVAILABLE PAPER GRADES***

## **RELEASE PAPER**

- We have a variety of siliconized papers in basis weights ranging from 25# up to 110#.
- Bleached and natural colors are available in a range of releases from very easy to tight.
- We have a selection of solvent and solvent-less silicone coated papers. EV/UV cured coatings are also available.
- Non silicone and quillon release papers are also made in a wide range of thicknesses.
- Color tinted coatings are available, but subject to minimum order quantities.
- FDA approved for direct food contact and medical grade applications are available.
- Various roll widths, roll diameters, core sizes, sheets and die cut pieces are all available.
- Our release papers are used in the shingle/roofing industries, food and baking, interleaving, label backing, adhesive and sealants, automotive, aerospace, medical and a bevy of other industries.

## **POLYCOATED PAPER**

- We offer a variety of coated substrates ranging from 8# tissue up to 140# kraft.
- Resins that we have available to coat with are: low density polyethylene, medium density polyethylene, high density polyethylene, linear low density polyethylene, ionomers, metallocene, polypropylene, EVA, EMA, acid copolymers, colors, and additive packages.
- We are also able to produce custom printed and coated papers in a variety of colors and styles.
- FDA approved stocks for medical use and direct food contact.
- Our poly coated stocks are heat sealable.
- Various roll widths, roll diameters, core sizes, sheets and die cut pieces are all available.
- Prime and odd lot stock is available.
- Applications in which our poly coated stocks are used are barrier and moisture holdout, food packaging, paint masking, freezer paper, interleaving and electronic applications.

## **WAXED PAPER**

- Dry waxed kraft paper 20# to 84# basis weights, available in bleached or natural colors.
- Waxed 2 sides kraft, 20# to 90# basis weights, available in bleached or natural colors.

- Waxed 1 side kraft, 30# to 70# basis weights, available in bleached or natural colors
- Semi waxed kraft, 18# to 47# basis weights, available in bleached or natural colors
- Various roll widths, roll diameters, core sizes, sheets and die cut pieces are all available.
- Used primarily in the food packaging and food service industries, but also as interleavers, steel wrapping, pallet liners and abrasion protection applications.

### **OFFSET/BOND PAPER**

- Bleached offset, 30# to 70# basis weights.
- Opaque offset, high brightness.
- Colored offset and bond grades are available.
- Excellent for printing and coating applications.
- Various roll widths, roll diameters, core sizes, sheets and die cut pieces are all available.
- Prime and odd lot stock is available.

### **PARCHMENT PAPER**

- Genuine vegetable parchment papers ranging from 25#, 30#, 35#, 45# and 55# basis weights.
- Genuine Vegetable Parchment is the premier sheet in the bakery market. Its release characteristics, heat resistance, grease resistance and wet strength mesh quite well with the needs of bakeries.
- Siliconized parchment papers on one or two sides in release level range from easy to tight.
- Greaseproof papers are available in a variety of colors.
- Custom printing is available on many grades (but are subject to minimum order requirements).
- Our papers are FDA approved for direct food contact.
- Various roll widths, roll diameters, core sizes, sheets and die cut pieces are all available.
- Our parchment papers are predominantly used in the food and baking industries. Tamale wraps, pan liners, baking sheets, candy and taffy wraps, meat interleaving, and butter/margarine wrap are just a few of the applications in which our products are used.

### **KRAFT PAPER**

- Virgin natural kraft, 25# to 90# basis weights with MG, MF, calendared or super calendared finishes.
- Virgin bleached kraft, 25# to 90# basis weights with MG, MF, calendared or super calendared finishes.
- Poly coated, silicone coated
- Recycled natural kraft 25# to 90# basis weights.
- Neutral PH/acid free kraft paper.

- Colored kraft paper—Black, Red, Blue, Green, Purple (deep colors).
- Natural Saturating kraft.
- Various roll widths, roll diameters, core sizes, sheets and die cut pieces are all available.
- Prime and odd lot stock is available.
- Used in a variety of industrial applications, wrapping, interleaving, coating, blade wrap, archival, and book covers.

### **BOARD STOCK**

- We can produce board stocks up to .125" thick.
- SBS (solid bleached sulphate).
- Clay coated (news, kraft, white back).
- Chipboard (plain ship, bending chip, coated chip)
- Plugboard
- Polycoated board—Food/medical grade, one side or two side coated.
- Acid free boards for archival and book cover stock
- Book Cover stock.
- All of our board stock is available in rolls, sheets or die cut pieces.
- Prime and Odd lot materials are available.

### **GLASSINE PAPER**

- We stock glassine paper as thin as 25# and as thick as 55#.
- Our Glassine paper is a super-calendared paper that is grease resistant, has a high resistance to the passage of air, and is almost impervious to the passage of water vapor.
- Glassine is a very smooth paper and can be produced so that it transparent, or semi-transparent, bleached or even colored (ie: blue).
- This stock also has a neutral PH and is approved for archival purposes.
- This paper is available in either roll form, sheet form or die cut pieces.
- Applications in which this stock is used are: envelope windows, carton windows, art/artwork packaging and archiving.

### **ONION SKIN PAPER**

- A very unique specialty paper. Onion skin gets its name because it is a very thin (a 9# basis weight) stock made with 25% real cotton.
- It is available in a smooth or cockle finish.
- It is available in standard white or canary (a shade yellow).
- Our typical grade of onion skin paper is used for writing, typing or stationary.
- We also have a specialized grade of onion skin that is approved for use by the US government and meets military spec P-157A.

This particular grade is used in the production of military flares, munitions, and detonators.

- Both grades of onion skin paper are available in roll, sheet or die cut pieces.
